

SWIM IN A STUNNING STAINLESS STEEL POOL

Imagine swimming in your own luxury pool before you head off for the day's adventures and then relaxing by the pool at the end of a hectic day. At the weekends, you can invite family and friends to pool parties. An expertly designed pool which harmonises with the design and décor of your property not only makes a statement, it provides plenty of opportunity to luxuriate, relax and have fun.

A pool can be designed to meet your every desire, be that a classic or minimalist design, and now you can have one of the most stylish and efficient types available – a stainless steel pool! A modern, timeless material used widely in interior design, stainless steel complements all types of homes, blending perfectly with different materials, especially glass.

An outstanding feature of stainless steel pools is that they can be built faster than you might expect. Using prefabricated stainless steel pool material and technology enables the pool to be built in less time than it takes using conventional construction methods. And stainless steel pools are extremely durable, ensuring the lasting beauty of the pool and, needing less water sanitisation; they are better for the environment and lower on maintenance.

These high quality pools are brought to the UK through a unique collaboration between two leading companies, Berndorf Bäderbau, Europe's premier stainless steel pool manufacturer, and award winning pool designer and builder, London Swimming Pool Company.

SHEER ELEGANCE

The special properties of stainless steel, careful processing and high quality pool equipment combine to produce this elegant swimming pool. The indoor level deck pool has a 6-step entrance stairs and is equipped with a counter-current unit which allows bathers to swim against either a vigorous or gentle stream of bubbles in the water, providing excellent exercise or massage. The pool features underwater lighting which bathes the water in glorious coloured lighting, creating different ambiances in the pool room.

SERENITY

Part of a luxury wellness centre, this beautiful level deck pool was designed to allow full view of the garden from the panoramic windows. The clean lines of the pool complement the art nouveau surroundings and create a serene atmosphere. The pool is fitted with coloured underwater spot lights, a counter-current unit, a spectacular Cobra fountain shower and a tubular bubbling lounge with neck rests for serious pampering.

CLASSIC RANGE OF MODULAR POOLS

The very latest on the market are modular stainless steel pools which can be built indoors or outdoors. Not only can you have a modular pool built in as little as six weeks, they come in at around £100,000 - ideal for those of us who aspire to having a luxury pool but always thought they were out of reach.

OUTSTANDING DESIGN & SERVICING

Not only does London Swimming Pool Company create stunning, award-winning pools (see its showcase at www.londonswimmingpools.com), it has a dedicated Servicing and Maintenance team which ensures clients' pools are kept in tip top condition. ■
