

## London's premier swimming pool company

*Our professional engineers will keep your pool and spa in excellent condition all year round. Call us on 0208 605 1255 to book your spring pool opening and ongoing servicing.*

### WILL IT TAKE 3 HOURS OR 3 DAYS TO OPEN YOUR POOL?

It depends on what we find when we remove the cover! If you've had your outdoor pool serviced throughout the winter, it's almost guaranteed that your pool will be in great condition so the opening service should take hours not days. You can get the pool ready and leave the heating switched off until you're ready to start using it.

If your outdoor pool has not been serviced during the winter, you could be greeted with green water like the one below, rather than crystal clear water.

*This is a genuine service call out to attend to a pool that had not been serviced during the winter season.*

The murky green water is a sure sign of chemical depletion, generally caused by falling leaves sneaking beneath the pool cover, sinking to the bottom of the pool and wreaking havoc with the water chemistry, not to mention staining the pool floor!

The good news is that even a pool in this condition can be restored to its former glory, but it will take at least 3 days - which could encroach on precious swimming time if you delay the opening. In order to get a pool that is in poor condition back to its former glory, the water will need to be chemically treated and left overnight so that the chemicals can work their magic, and then followed up the next day to clear leaves and other debris. On the final day, we conduct all tests and switch on the heating. A three-day exercise for what should take less than a day, plus the cost of all those chemicals.

If you have the slightest concern about the condition of your pool water, it's important to schedule the opening early as it could take longer than you anticipate to complete the work.

### BEAT THE RUSH!

**Clients have already started booking their pool openings. Do schedule your opening early to guarantee that your pool is ready for swimming when the warm weather arrives.**

### REGULAR SERVICING KEEPS POOL IN ACTION FOR RESIDENTS

**A great testimonial from one of our clients:** "Our pool is situated in its own pool house. It's private but communal and open to the residents of 40 houses in our Estate from 6.00am to 10.00pm daily, 7 days a week.

"The large majority 80%+ of the households use the pool - typically swimming 1-3 times a week. On average ~10 people enter the pool-house daily. At peak times this figure may rise to ~15. The pool engineer visits daily to conduct chemical tests and weekly service.

"The benefit of regular (and additional annual) servicing is that the plant can work at optimal efficiency, avoiding breakdowns which require expensive replacements and possible pool closures. In five years we have only had to close the pool for three days for unscheduled plant maintenance."

**Pool manager of a Wimbledon community pool installed and serviced by London Swimming Pool Company.**

### SERVICE ENGINEER TURNED POOL DESIGNER NAMED POOL STAR OF THE YEAR!

We are delighted to announce that one of our former pool servicing engineers, Jason Beirne, who is now designing luxury pools in our Design & Build division, has won a prestigious industry award for his passion and commitment to learning, developing and delivering excellent client service.
